MANHOLE COVER D400 LOCKABLE FOR PVC TELESCOPIC MAINS

Standard: EN 124-2:2015
EN 124 Class: D400
Maximum Load: 40 tonnes
Material: Ductile (Spheroidal) Cast Iron EN-GJS-500-7
Frame Diameter: 380 mm
Cover Diameter: 314 mm
Locking System: 1 Lock
Shape: Round

Colour

APPLICATIONS

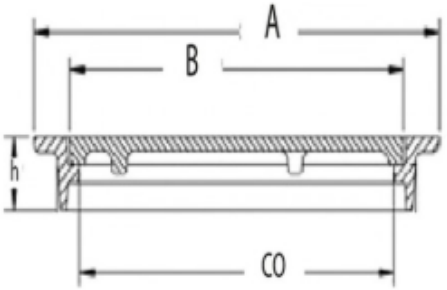

The Class D400 round cast iron manhole cover for a 315 mm PVC telescopic riser is designed for the construction of inspection and sewer chambers installed on pipelines beneath roads, pavements, cycle paths, and parking areas. The cover provides reliable protection for the access chamber and ensures safe operation even under heavy mechanical loads. Its robust cast iron construction offers exceptional strength, high wear resistance, and outstanding durability against mechanical damage, adverse weather conditions, and aggressive environments, including petroleum-based substances. The cover is compatible with 315 mm PVC telescopic risers, allowing precise height adjustment to accommodate changes in road surface levels while ensuring secure and reliable access to underground utility networks.

ON REQUEST

- Custom design on the cover is available upon customer request.
